SMARTER CHOICE.

GALAXY MGR G-2

ALL STEEL

The Galaxy MSGR has a special tread pattern for optimum grip in grading operations. Special compounds protect against lug tearing and heavy wear, and sidewall protectors safeguard against damage and act as a shock-absorber. The ALL-STEEL tire has special belts for a durable carcass and its open channel design provides excellent self-cleaning.

GALAXY LDSR E-3/L-3

ALL STEEL

The LDSR's S-type tread has the optimum lug-to-void ratio for loader/dozer traction. Its unique stepped lug design and open-channel layout help to keep it clean and free of mud for dependable non-stop performance. With extra protection against sidewall damage and special belt construction for carcass durability, this ALL-STEEL cut and chip resistant tire is the one to count on.

GALAXY HTSR E-4/L-4

ALL STEEL

The deep tread and special compound on the HTSR mean you can work longer and harder without heat build-up or premature failures. The tread is designed specifically for traction and self-cleaning, and the special belt construction strengthens the ALL-STEEL tire's carcass for mining/hauling operations with a longer cycle of operations.

GALAXY YARDMASTER RADIAL IND-3

The Galaxy Yardmaster Radial has a heavy-duty tread designed for high mileage, maneuverability and stability. Its superior compound resists cuts, chips and abrasions giving it a longer tire life even on the most aggressive surfaces. The ALL-STEEL tire is built with extra protection against sidewall damage and has a special belt design for carcass durability.

DEPENDABLE PARTNERS FOR YOUR JOB SITE

Galaxy brand tires have been a leader for decades in OTR tires and are a preferred choice of Original Equipment Manufacturers worldwide. The Galaxy range of Radial OTR tires are specially engineered to keep pace with the challenging needs of high pressure job-sites. At Galaxy, we know that business can't afford to stop for tire problems - that's why our high performance tires are forged to work harder and last longer.

ROBUST CONSTRUCTION

Getting more work done on the job site means working your machinery longer and harder, and can put extra pressure on your tires. Galaxy tires' robust radial construction and special compounds makes them capable of excelling even in the most extreme working conditions.

WORLD-CLASS DESIGNS

Our research and development team works closely with customers to understand the specific factors leading to success on the job site. With cutting edge tire design and the most modern compounds, our tires aren't just built - they're highly engineered to deliver the absolute best in traction, self-cleaning and durability.

APPLICATION SPECIFIC

The secret to delivering the best, longest lasting and most cost-effective tire is to design tires specifically for the job they'll be performing. Galaxy tires are purpose built and application specific - our designers have decades of experience delivering the best available performance and value.
